

# Blindspots: A Presentation for Parents, Guardians & other Adults

Presented by The Council on Addiction Prevention and Education

# E-Cigarette & Vaping Paraphernalia

The below images show the various devices currently on the market. Our room features only a fraction of what is available on the market.

The Juul is losing popularity as the nation takes measures to curb e-cigarette youth among use. Unfortunately, there is always something new popping up on the market. By the time Juul pulled most of its flavor pods from the market in October of 2019, many teens had already moved on to an array of newer, disposable vape products....

# The New Trend- Disposable E-Cigarettes

Among the disposables that are most popular, there's Puff Bar, Zaero, Posh, SEA Air and so many more. They are designed for one-time use and then tossed....

One (Puff) bar has about **300 puffs** and can contain about as much nicotine as **TWO or THREE PACKS OF CIGARETTES!**

These flavors are still on the market because of a legal loophole on the flavor ban which only restricts flavors for closed-system e-liquid cartridges, like JUUL and its pods, and does not apply to refillable cartridges or disposable products.

# Marijuana Concentrates and Their Harmful Effects

Vaping and inhaling **THC-rich resins** extracted from the marijuana plant is on the rise. This practice is called

## **DABBING**

These extracts come in various forms.....

**Hash or Honey oil** (a goeey liquid)

**Wax, budder & mdsh** (a soft solid with a texture like lip balm)

**Shatter** (a hard, amber-colored solid)

Another Danger is in preparing these extracts, by using what is known as a “DAB RIG”- this process can involve the use of butane (lighter fluid) and/or a blowtorch!!

(Honey)

Wax/Budder

(Shatter)

These extracts can deliver **EXTREMELY LARGE AMOUNTS** of THC to the body!

## Homemade vs. Store-Bought Dab Rigs

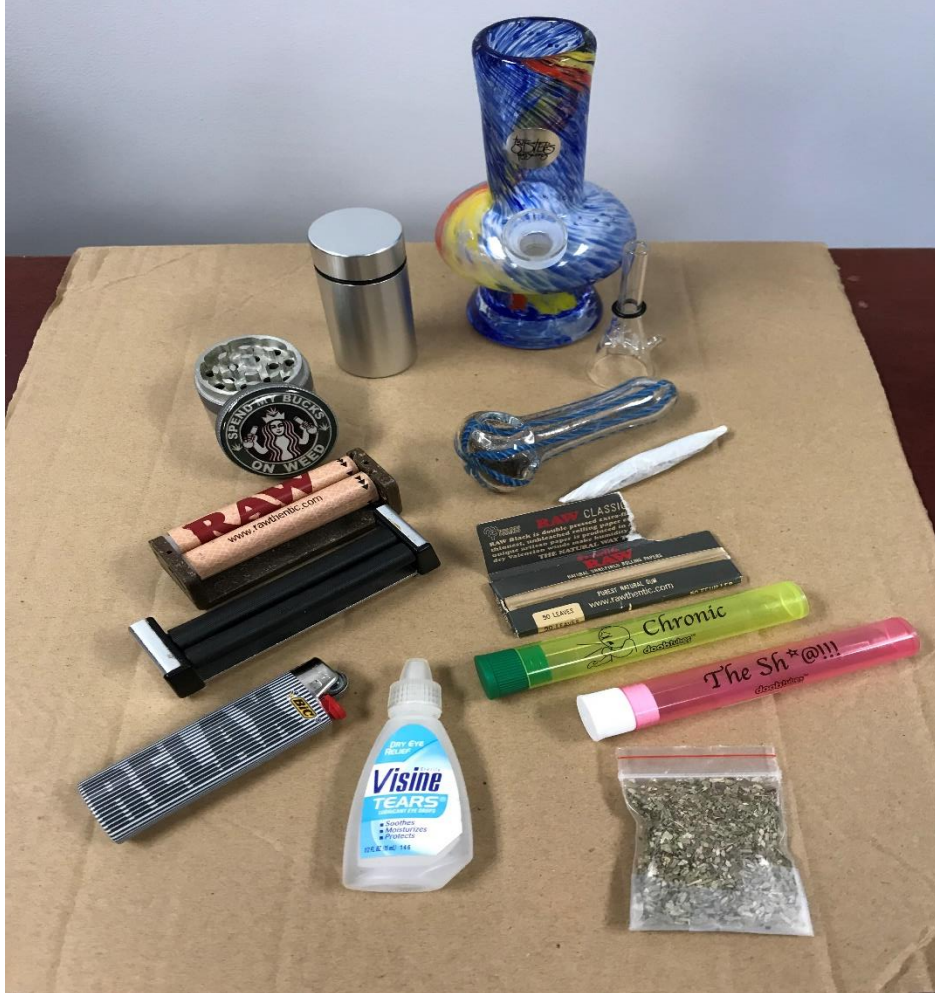

These items can cost hundreds of dollars

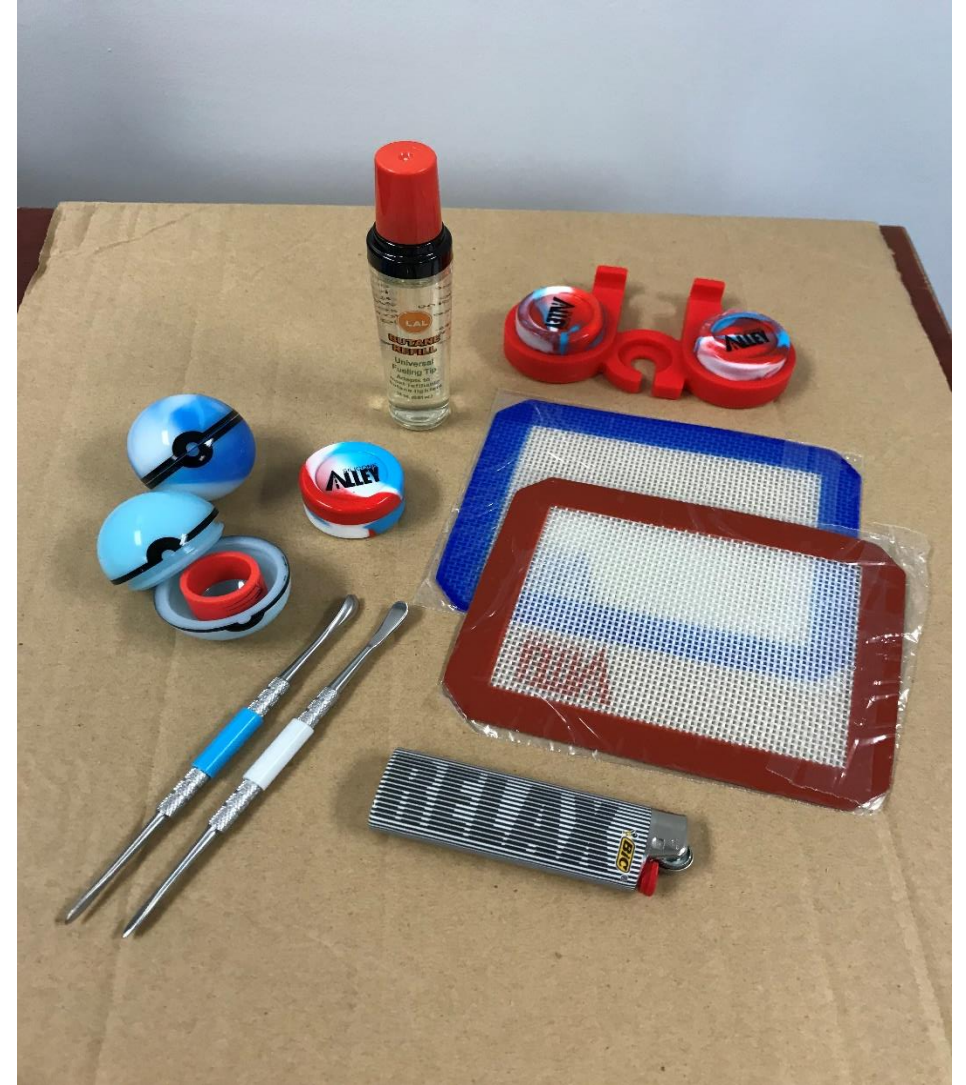

Numerous people have caused fires and explosions resulting in serious burns and trips to the emergency room!

# Marijuana & "Dabbing" Paraphernalia

Water pipes come in all shapes and sizes. *Doob-tubes* hold a joint and prevent you from smelling The marijuana.

Dabbing has become very popular, the rubber pad is used because the substance is very sticky. Butane is needed to extract the THC so be on the lookout for containers of Butane.

# Home-made Paraphernalia

Our room features this water  
Bottle with two burnt out holes

But, kids can be

*very creative*

Other homemade pipes >>>

You can easily access “how-to” videos on the internet

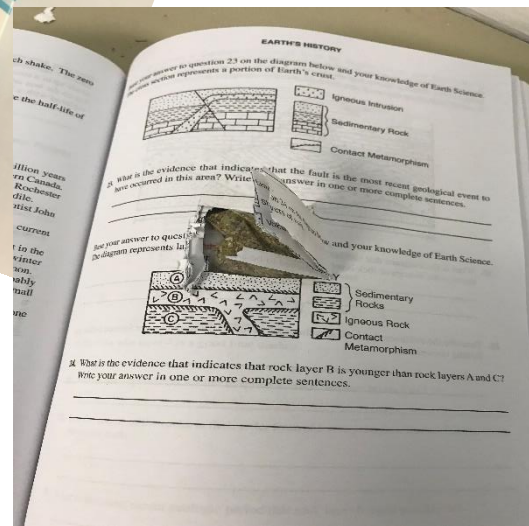

# “Stash” Containers

Stash containers come in so many *creative* alternatives, and are readily available on the internet...

All you need is a credit card!

Stash containers can be bought or “home-made. These were featured in our room.....

# Clothing, Stash Pouches & Hidden Innuendos

Innuendos on posters and novelty items are readily out there. A few clothing companies actually, manufacture clothing and accessories with “stash pockets”.

# Still Looking for Answers?

The Council on Addiction Prevention and Education (CAPE) continues to work to educate the community with the most up-to-date information on Substance Use Disorder, the Opioid Epidemic and the E-Cigarette and Vaping Epidemic impacting our community. We offer prevention education, recovery services and referral services. We are here as a resource for you! Please feel free to contact us for additional resources and information.

**There is POWER in knowledge and There is HOPE!**
