

Web Administration for the Cloud

Microcredential

This microcredential will provide students with the courses to become proficient in the skills required to design, code, and host dynamic web sites. Students will learn HTML, CSS, Javascript, XML and server-side code including database integration. In addition, students will become familiar with cloud infrastructures and hosting the web server on the cloud.

For more information, contact the Admissions Office at (845) 431-8010 or visit www.sunydutchess.edu/academics

This microcredential can
be stacked into:

Web Administration Certificate

**Computer Information
Systems A.A.S.**

Because a Microcredential is comprised of short course sequences, requirements for a Microcredential are to be completed at DCC. Any exception to this would require departmental approval in order to transfer in credits.

No more than 50% of credits may be accepted in transfer.*

A digital badge will be awarded to students who complete the required coursework and earn a 2.0 or higher in each course.

If the Microcredential contains a certification exam, a successful score on that exam is also required for the award of the Microcredential.

**Certain courses may be required to be taken at DCC; check your specific program for these exceptions.*
